OUR HERITAGE

Innovating the use of natural stone.

Long lasting and
durable stone sheets

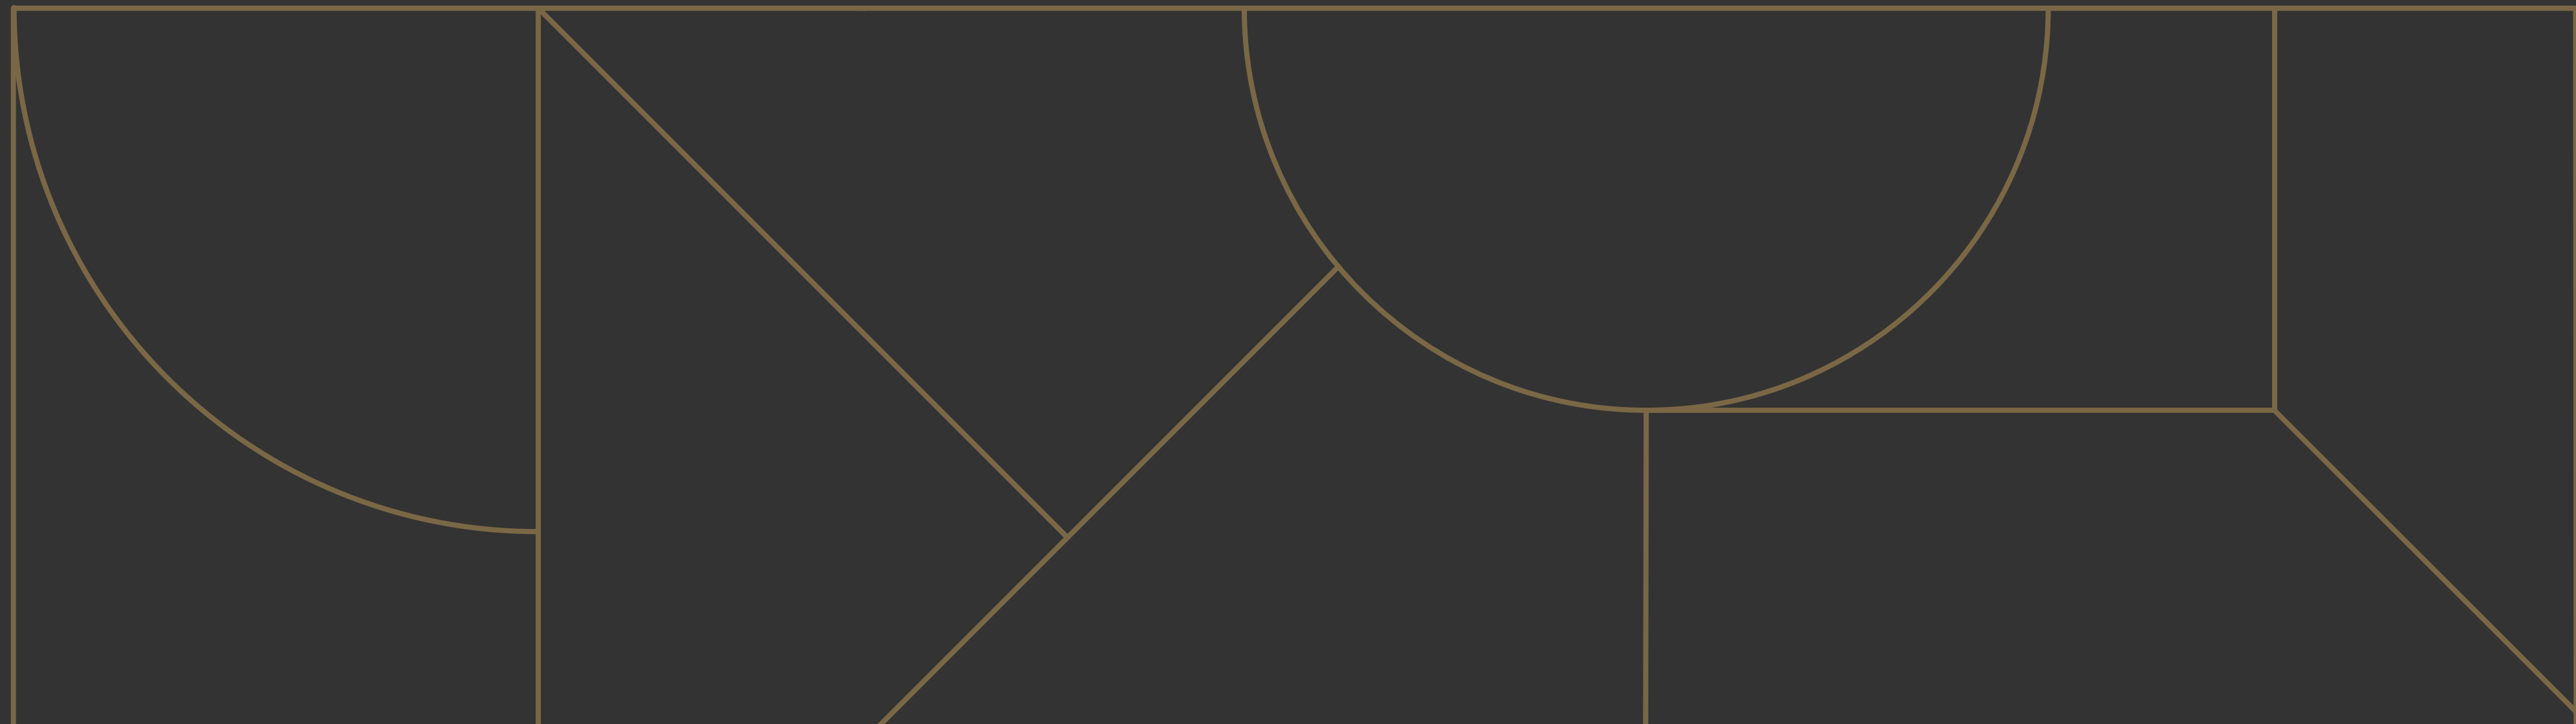

Designed to be good
for the environment

Stein Art is a technology company dedicated to pushing the boundaries of 2mm flexible stone manufacturing and production. Originally from Germany, it is presently based in the United Arab Emirates in response to the growing demand for its products in the Gulf region.

In the business for over 20 years, Stein Art has been a pioneer in developing breakthrough products for the construction and design industry.

The company has partnered with various governments and institutions all over the world, winning awards and accolades such as the "Salon International Des Inventions" from Europe.

Building upon a tradition of high-quality service, Stein Art's goal is to empower clients through innovative stone products and designs.

HOME INTERIOR

RETAIL INTERIOR

— UNIQUE AND INNOVATIVE

Add value to your space with natural flexible sandstone.

Combining versatility and style, Steinart's natural 2mm flexible stone sheets can transform any surface—from indoor décors, outdoor façades and Flooring to lamps, boats, and even cars.

Made of 100% sandstone, or Marble or concrete; using ingredients imported from Germany, the exterior can be completely sealed, protecting it against dirt and limescale deposits. The sheets can also be arranged to create jointless stone walls.

RETAIL FLOORING

— OUR PRODUCTS

Sand and stone redefined.

Get high-quality materials for your construction and design needs with Stein Art's revolutionary products.

OFFICE STAIRCASE

— THE INNOVATIVE SOLUTION

Stein Art Concrete

From strengthening floors to building walls, you can expect to get superior results with Stein Art Concrete. Designed as a flex-built concrete sheet or roll, it measures 2 millimetres in thickness. This cutting-edge product is fire-resistant, waterproof and does not crack easily.

Stein Art Concrete is composed of black sand and concrete, mixed together for better durability. Because it is flexible, the product can be applied on curved or round surfaces. With Stein Art Concrete, the whole finished product is very consistent in strength, and structural defects on surfaces are eliminated.
